

HYDRO CERAMIC WAX

HYDRO CERAMIC WAX is an innovative new kind of wax with ceramic characteristics. The strong hydrophobic properties of this product lead to an excellent beading of the final rinse water. Thanks to this faster runoff we have a better overall drying result. The wax creates a shield of protection which will safeguard the vehicle's surface from the UV-light and will slow down the process of oxidation substantially. Moreover, it creates a protective layer that is resistant against acidic rain. The vehicle stays longer clean in between washes. The ceramic wax makes it more difficult for static dirt and mud to stick to the vehicle. Finally, the **HYDRO CERAMIC WAX** will leave a deep gloss and shine to the paint of the vehicle.

INSTRUCTIONS FOR USE

Recommended to be used in automatic carwashes (8-15 ml per car). For manual application through foam gun dilute 1:10. Apply on wet surface. Rinse thoroughly.

TECHNICAL SPECIFICATIONS

Product code	: ENT-20200714
Colour	: Red
Fragrance	: Characteristic
pH 100 %	: $4,5 \pm 0,5$
Dosage	: 8 – 15 ml per car
Biodegradability	: > 90 %
Packaging	: 5 – 20 L
Specific gravity	: 1,000 kg/L ± 1 %

ENVIRONMENTAL INFORMATION

The surfactants in this product meet the criteria for biodegradability as established in Regulation (EG) n° 648/2004 concerning detergents.

SAFE HANDLING AND STORAGE

The complete safety instructions of the product can be found on the material safety data sheet. Only for professional users/specialists.

Keep the product in the original and closed packaging and protect from extreme temperatures.
